

MULTIPLIER CONFERENCE SUSTAINABLE SERVICE IN DS GOOD PRACTICES IN THE SOCIAL INCLUSION OF PEOPLE WITH DOWN SYNDROME

ALDO-CET organized 2 events to multiply the results of the Sustainable Service in DS project in order to cover an area as wide as possible for their transferability.

The events took place in Craiova and Băilești, Romania and followed the same work agenda. 60 participants viewed the training activities and materials, got familiar with the e-training platform and enjoyed the transnational educational experience of the 12 ALDO-CET detectives who were among its protagonists.

In an atmosphere dominated by emotions and friendship, the participants identified needs of their communities and made plans to solve them.

The results of the Sustainable Service in DS project demonstrate that people with Down syndrome can be active actors and have the ability to act and advocate for the achievement of sustainable development targets in their communities.

Good luck in your further service-learning projects!
